SUBJECT INDEX TO VOLUME 15

Acquired immunodeficiency virus:
  AIDS, 269
  demographic considerations in autopsy studies of, 271
  and Epstein-Barr virus, 923
  HIV, 269
  human immunodeficiency virus, 269
  infections in children with, 269
  and leiomyoma, 923
  risk factors associated with, 271
Adenovirus bronchopneumonia:
  E1A protein in, 291
  55-kDa E1B protein in, 291
  expression of adenoviral proteins in, 291
Adrenocortical heterotopia:
  adrenal cortex, 51
  immunohistochemistry, 53
  in the placenta, 51
Anencephaly:
  bombesin immunoreactivity in, 385
  lung development as related to, 377
  pulmonary gastrin-releasing peptide expression in, 377
  pulmonary hypoplasia as related to, 377
Acquired laryngeal stenosis:
  fibrosis and, 655
  histopathologic fundamentals of, 655
  mucous gland hyperplasia in, 655
Arthrogryposis multiplex congenita:
  fetal akinesia deformation sequence (FADS), 617
Ascariasis:
  of the kidney, 609
    and *Ascaris lumbricoides*, 609
    renal infestation, 609
Asynchronous pulmonary hyperplasia:
  cystic adenomatoid malformation, 81
  growth factors in, 81
  in association with tracheal atresia, 81
  laryngial atresia, 81
  lung development and, 81
  pulmonary sequestration, 81
  ultrasound use in, 81
Atrioventricular canal malformations:
  congenital heart defects, 11
  endocardial cushion defects, 11
  outflow tract abnormalities in, 11
  teratology of Fallot, 11

Beckwith-Wiedemann syndrome:
  associated with digital fibroma, 147

Brachmann-de Lange syndrome:
  and ulnar agenesis, 895

Carcinoid tumors:
  in the appendix, 641
Carcinoma of the tongue:
  associated with Fanconi anemia, 597
  human papillomavirus and, 598
  in a survivor of clear cell sarcoma of the kidney, 327
  squamous cell carcinoma in, 327, 597
Cardiomyopathy:
  familial, 181
  right ventricular dysplasia, 181
Castleman's disease:
  angiofollicular lymphoid hyperplasia and, 857
  Kaposi's sarcoma and, 857
  lymphoma—B cell and, 857
Cat-scratch disease:
  associated with *A. felis*, 3
  associated with *R. henselae*, 3
  lymph node DNA and, 3
  necrotizing lymphandenitis and, 3
Cellular mesoblastic nephroma:
  aneuploidy associated with, 679
  genomic imprinting and, 679
  kidney neoplasms and, 679
  with hyperdiploidy, 679
  with relaxation of imprinting of the maternal *IGF2* gene, 679
Cervical teratomas, 221
Choroid plexus:
  carcinoma in, 109
  duplication of chromosome 9p in, 109
  FISH analysis single cell digests of, 115
  hyperplasia of, 109
  in-situ hybridization and fluorescence, 113
  papilloma in, 109
  preparation of single-cell suspensions, 111

Chromosome 6P:
  partial deletion of, 941
Clear cell carcinoma of the kidney:
  associated with carcinoma of the tongue, 327
Complications of perinatal care, 539
Congenital polyvalvular cardiac disease:
  anomalies excluding heart, congenital, 301
  cytogenetics of, 303
  heart anomalies, congenital, 300
  without chromosomal abnormalities, 299

Cystic dysplasia:
and renal malformations, 885
of the testis, 885
Cystic fibrosis:
Pseudomonas aeruginosa in the tracheobronchial tree in patients with, 707
Cytomegalovirus:
immune suppression, 515
leukodepletion and, 527
susceptible patient populations, 520
bone marrow transplant recipients, 521
HIV-infected patients, 525
infants, 520
organ transplant recipients, 523
transmitted by transfusion, 515

Desmoplastic small round cell tumors:
intra-abdominal, 797
involving the peritoneum, 797
Diabetes mellitus:
associated with diarrhea, 477
associated with hyperimmunoglobulin E syndrome, 477
associated with the absence of the islets of Langerhans, 477
Digital fibroma:
as related to Beckwith-Wiedemann syndrome, 147
bone invasion in, 147
Ductus venosus:
agenesis, 39
fetal hepatic circulation and, 39
hydrops fetalis and, 39
portal hypertension, 39

Ebstein's anomaly:
fetal parvovirus B19 infection and, 121
liver disease and, 121
Ectopic adrenal tissue:
adrenal rest tumor and, 763
in the inguinal region, 763
Endocarditis:
in the tricuspid valve, 535
Epidermolysis bullosa:
Dowling-Meara type, 191
Epstein-Barr virus:
immunocompetence related to, 283
and leiomyoma, 923
in lymphoid tissues, 283
and myocarditis, 805
in non-Hogkin's lymphomas, 283

Facial tumors, 643
FADS:
athrogryposis multiplex congenita, 617
Fanconi anemia:
associated with squamous cell carcinoma, 597
Fetal akinesia deformation sequence (FADS):
athrogryposis multiplex congenita, 617
Focal peliosis hepatis:
following asphyxial death, 589

Gastritis:
chronic, associated with *Gastrospirillum hominis*, 429
Gastrospirillum hominis:
associated with chronic active gastritis, 429
and *Heliobacter pylori*, 429
and peptic ulcer disease, 429
Germ cell tumor:
and urticaria pigmentosa, 163
Giant cell tumors:
in bone, 769
in the skull, 769
Glycoprotein syndrome:
carbohydrate deficient, 175
olivopontocerebellar atrophy in, 175
Granular cell tumors:
and estrogen therapy, 791
in the thyroid gland, 791
Griscelli syndrome:
hemophagocytosis in, 309
lymphohistiocytosis in, 309
partial albinism associated with, 309

Henoch-Schönlein purpura:
ileal stricure in, 333
small bowel stricture as a complication of, 333
Heparinized plasma:
suitability for use in routine biochemistry, 555
Hepatic vascular malformation, 155
Hepatic angiomyolipoma:
associated with tuberous sclerosis, 213
Herpes:
encephalitis associated with, 131
epilepsy and, 131
herpes simplex, 1, 131
associated with seizure disorder, 131
Hirschsprung's disease:
aganglionosis coli, 23
identification of, 30
ileocecum, 23
lethal spotted, 23
megacolon, 23
neuroblast distribution in, 30
pathogenesis of, 32
segmental aganglionosis, 23
skip areas, 23
tissue processing, 28
zonal colonic aganglionosis, 23
Hodgkin's disease:
following successful treatment of gastric teratoma, 455
Human ertythropoietin:
in pre- and postnatal kidneys, 875
in-situ hybridization of, 875
Human immunodeficiency virus:
Acquired immunodeficiency syndrome, 269
AIDS, 269

demographic considerations in autopsy studies of, 271
HIV, 269
infections in children with, 269
risk factors associated with, 271
Hyaline membrane disease, 639
Hyaline membrane disease:
basophilic bodies, 99
Feulgen-positive bodies in, 99
in the newborn, 99
Hyperimmunoglobulin E syndrome:
associated with diabetes mellitus, 477

Islets of Langerhans:
their absence associated with diabetes mellitus, 477

Kaposi's sarcoma:
and Castleman's disease, 857
Kawasaki disease:
use of conjunctival biopsy in, 547

Laryngotracheoesophageal cleft:
with subglottic stenosis, 321
Leiomyoma:
and acquired immunodeficiency syndrome, 923
in the adrenal gland, 923
and Epstein-Barr virus, 923
Lowe's syndrome:
clinicopathologic approaches to, 389
genetic approaches to, 391
molecular pathologic approaches to, 389
Lungs:
bilateral agenesis of, 781
bilateral aplasia of, 781

Myofibrosarcoma:
in the head and neck, 403
soft tissue sarcoma and, 403
Myocarditis:
and Epstein-Barr virus, 805
repetitive, 805
Myofibromatosis:
as a disseminated angiocentric variation, 571
congenital and generalized, 571

Nephrogenic rests:
dormant nodular renal blastema, 223
associated with a mesoblastic nephroma, 469
associated with renal tumors, 469
and Wilms' tumor, 223
Neu-Laxova syndrome:
associated characteristics in, 58
autosomal recessive inheritance, 57
icthyosis and, 57
intrauterine growth retardation in, 57
necropsy in, 57
Neuroblastoma:
and monozygotic twins, 931

Neuroectodermal tumors:
brain neoplasm and, 733
cerebellar, 733
with prominent neuronal differentiation, 733
congenital primitive, 949
medulloblastoma and, 733
MYCN oncogene and, 733
Non-Hodgkin's lymphomas:
associated with Epstein-Barr virus, 283
Nondysplastic fetal renal hypoplasia:
associated with severe oligohydramnios, 485
Nonparasitic cysts of the liver:
hepatobiliary lesions associated with, 419

Oligohydramnios:
severe, associated with nondysplastic fetal renal hypoplasia, 485
Olivopontocerebellar atrophy:
in carbohydrate-deficient glycoprotein syndrome, 175
Ossifying renal tumors:
intralobar nephrogenic rest and, 745

Parvovirus B19 infection:
concurrent liver disease, 121
Ebstein's anomaly and, 121
Pediatric anatomic pathology, quality assurance in, 957
Peptic ulcer disease, 429
Polysplenia syndrome:
pulmonary arteriovenous malformation associated with, 463
Primary mediastinal large cell lymphoma:
B-cell lymphomas and, 562
immunophenotyping in, 562
with sclerosis, 562
Progressive osseous heteroplasia:
calcification due to, 813
fibrodysplasia ossificans progressiva, 813
manifestation in osteoma cutis, 813
and soft tissue ossification, 813
Pulmonary artery muscularization:
in infants of diabetic mothers, 690
persistent hypertension associated with, 690

Renal tubular dysgenesis:
and proximal convoluted tubules, 915
Renal arterial tree:
arteriography in, 260
fractal dimension of, 129
fractal geometric analysis of, 259
morphometry of, 259
Rhizomelic chondrodysplasia punctata:
correlation with other peroxisomal disorders, 503

Sialic acid storage disease:
as associated with lysosomal storage disease, 443
associated with nonimmune hydrops, 443
as a cause of cytoplasmic vacuolation, 443
in infants, 443

Smooth muscle tumors:
and acquired immunodeficiency syndrome, 923
and Epstein-Barr virus, 923
and leiomyoma, 923
Soft tissue chondroma, 437
Solid tumors:
comparative genomic hybridization technique and, 831
gene amplification screening and, 831
polyphenotypic tumor, 831
rhabdomyosarcoma and, 831
Squamous cell carcinoma:
associated with carcinoma of the tongue, 327
associated with Fanconi anemia, 597
human papillomavirus and, 598
Sudden infant death syndrome:
and minor inflammatory lesions, 649

Thyroid gland:
and estrogen therapy, 791
granular cell tumor in, 791
Tuberous sclerosis:
associated with hepatic angiomyolipoma, 213

Twin transfusion:
monochorionic placenta, 363

Ulnar agenesis:
bilateral, 895
and Brachmann-de Lange syndrome, 895
and diaphragmatic defects, 895
Umbilical cord stricture:
and intrauterine fetal death, 723
antenatal death and, 723
in twins, 723
Uropathy:
bilateral, 245
clinical features of, 248
in fetuses, 245
obstructive, 245
Urticaria pigmentosa:
malignant germ cell tumor and, 163

Wilms' tumor:
dormant nodular renal blastema, 223
and nephrogenic rests, 223

Xanthogranuloma:
atypical juvenile, 169
